

# POUCHES AND ROLLSTOCK FOR HOUSEHOLD CLEANERS

Hard-to-hold and indispensable around the home or workplace, cleaning materials present challenges - and opportunities - in flexible packaging. CLP has devoted years of research into creating laminates and pouch structures that not only handle aggressive cleaning materials, but also add value.

Spouts and shaped laser scoring make refill pouches beautiful and easy to use. Fitments add greater convenience, including reclosable spouts. Specially reinforced gussets make stand-up cleaner pouches sturdier and absolutely leak-proof.

We developed special laminates-aggressive solvents, including durable webs for acetone, stain remover and paint remover. A special construction for especially aggressive cleaning powder - with a gas release fether that prevents deformation of the pouch - takes flexible packaging to new levels.

And our rollstock for wet wipes - from baby wipes to floor cleaners and stain removers - offer outstanding performance on packaging machinery and store shelves.
