

POUCHES & ROLLSTOCK FOR COFFEE

With flavors both robust and delicate, coffee demands packaging protect strength and finesse. High-barrier laminates protect flavor from oxidation and moisture, need to be stiff enough to withstand vacuum packing and tough enough to resist punctures.

And to shine amid the competition on crowded coffee shelf, the packaging must glow with artistic graphics and precise printing - including the matte/gloss combinations that CLP helped pioneer in the industry.

CLP's coffee packaging - recognized worldwide for its beauty as well as its performance - is the pick of the coffee producers worldwide. CLP also applies the same technology to packaging for yeast.

Package Types:

- Ground coffee
- Brick pack: regular or double wall (vacuum packed)
- Pillow pack (nitrogen flushed)
- 4P pack
- Fresh-Roasted Beans
- Brick-pack - regular or double wall
- Pillow pack

Special Features:

- Easy-peel for pillow and brick packs
- Laser scoring of pillow pack T.D. or corners
- Numerical sealed printing inside pouch for promotion and tracking
- Film can run on vertical form-fill-seal or vacuum lines

All of CLP's coffee packaging materials meet ISO, BRC and HACCP global standards FDA regulations.
