Recyclable Mono-material Retort pouch

TADBIK as a world leader of advanced Flexible Packaging proud to announce that we completed the development of Recyclable retort pouch

Our Flexible packaging division is at the front of important trends in product protection, packaging design and minimization, customer convenience, waste reduction, and positively impacting the environment.

Our Mono Material Retort pouches:

- The best sustainable product in the retort packaging market
- Unique Barrier Layer provides Moisture and Oxygen protection comparable to the non-recyclable, multilayer mixed film structures that have been the standard in the industry
- Excellent Stiffness and Retort stability
- Excellent Machinability

Recyclable Retort stand-up pouches are an affordable and sustainable way to package your product.

The Power of One
